

Business Phone

Local and Long Distance Business Phone Service

Stay connected with EATEL's reliable and affordable phone service for regional, nationwide, and international business calling. With Business Phone, enjoy a complete range of telephone services, from basic features like voicemail to PBX and key lines for phone service that terminates in your onsite telephone equipment.

Primary Rate Interface (PRI)

Ideal for call centers or to backup dedicated private lines, PRI service provides digital voice and data service delivered over a dedicated T1 line.

Need an SIP Trunk?

With a business SIP trunk, voice and data signals are carried over a single circuit, or trunk. When your voice traffic is low, the circuit automatically allocates more bandwidth to data; when a call is placed, voice traffic gets priority to ensure call quality. SIP business trunks can work with existing analog phone lines as well as PBX equipment. Digital or ISDN-PRI trunks are available.

Benefits of an SIP Trunk

- High-quality, reliable voice service and Internet access
- Automatically prioritizes bandwidth between voice and data signals
- Voicemail backed up to EATEL data center to ensure business continuity in case of a power outage
- Transition seamlessly to VoIP

Why Choose EATEL for Business Phone service?

- **Reliable connectivity**- EATEL has been offering local phone service for over 80 years
- **Affordable** - Custom packaging available for your business phone needs, including unlimited long-distance calling plans and free local calling
- **High-Quality** service to meet your business needs
- **Features** - Each plan includes caller ID with name and number, call forwarding, and three-way calling. Choose additional features that meet your needs.
