

A BRIGHTER APPROACH TO BACKUP

Get back to work faster after an outage.

BackupPro, powered by Rubrik™, the industry's first Converged Data Management platform for complete data protection and data services. Rubrik can scale to meet your medium-to large-sized data storage needs, and eliminates backup software by integrating deduplicated storage, catalog management, and data orchestration into a single plug-and-play appliance that scales linearly.

BackupPro powered by Rubrik offers unified hardware and software backup focused on shortening the time between an outage and the moment your data is available again.

How can BackupPro powered by Rubrik work for me?

- Simple to scale and easy to setup with automated discovery
- Features robust deduplication for maximum storage efficiency
- End-to-end encryption secures data at-rest or in-transit
- Global real-time search for files across all snapshots
- Object-level recovery for Microsoft environments without a database rollback or restore
- End-user restore allows granular control over user access at a platform level, regardless of location
- Instantly recover a VM backup from the Rubrik storage infrastructure
- Integrates directly with VMware vSphere
- Perfect solution for heavily virtualized customers with over 200 virtual machines
