

# BUILD TO GROW—ON THE CLOUD

Scalable. Easy. Transformative.  
The cloud is waiting for you.

If you had more time, what could you accomplish?

Our Cloud can get you out of the never-ending hardware-management lifecycle. You won't have to keep up infrastructure, manage hardware updates, or suffer through excessive downtime ever again.

What you do with all that extra time and resources is up to you . . . but here is what we recommend: focus on running your business, and re-assign your IT staff to more strategic initiatives. On the cloud, you'll be agile, scalable, and ready for growth.

## You've Never Experienced a Cloud Like This

Here's what sets the EATEL Business Cloud apart:

We're easy.

- **Retain complete control.** We're local, so you'll always have access to and physical control over your infrastructure.
- **Test drive.** Move your development environment and migrate production later.

We're economical.

- **Save on capital costs.** Never buy another physical server again.
- **Pay-as-you-grow.** Virtually unlimited resources at your disposal; pay only for what you use.

We're innovative.

- **Harness the power of VM-ware vSphere and vCloud Director** – two top brands in virtualization technology.
- **Virtually load balance.** As an add-on, virtual load-balancing is including with advance load balancing, based on F5 Big IP.
