

MANAGED CYBERSECURITY

NEXT-GENERATION SECURITY MANAGED BY PEOPLE YOU CAN TRUST.

Protect your business and stay ahead of threats with EATEL Business. We combine powerful technology with advanced knowledge to help protect your business from online threats.

KEEP YOUR IT ASSETS SAFE WITH AN EASY, END-TO-END SOLUTION.

EATEL Business offers a managed cybersecurity solution in virtual or physical environments with devices either in one of our local, hardened Data Centers or at your location depending on your needs. You will have real-time visibility of cyber threats to your organization, greater security and control of your network and application traffic, and consultative support with EATEL engineers to help with security prevention.

At EATEL Business, we know that small and medium-sized business have different IT challenges than larger enterprises, limited IT resources, and budgetary restraints. We can work with you to right-size the firewall services you need to protect your business.

What we can do for your business:

RISK ASSESSMENT

- We'll work with you to understand your security weak points and vulnerabilities prior to installation so that we can limit your security exposure

Easy Configurations

- No need to learn a new syntax or interface, we'll make the changes for you.

Firmware Upgrades

- Your firewall stays up-to-date. No need to read patch notes for each new release.

Hardware Monitoring

- Constant monitoring of the status of your switches, firewalls and access points, along with other hardware.

Centralized, Automated Reporting

- Receive customized, actionable reports that show statistics with 100 percent transparency.

Managed Evolution

- Stay ahead in the cybersecurity arms race – we'll recommend new features exclusive to your business.

Compliance

- Stay in line with the controls and regulations.

Backed by industry-leading Fortinet technology, EATEL Business will provide the dedication, expertise, and technology to make security one less thing for you to worry about.
